

Source-to-Pay (S2P) Workflow Automation

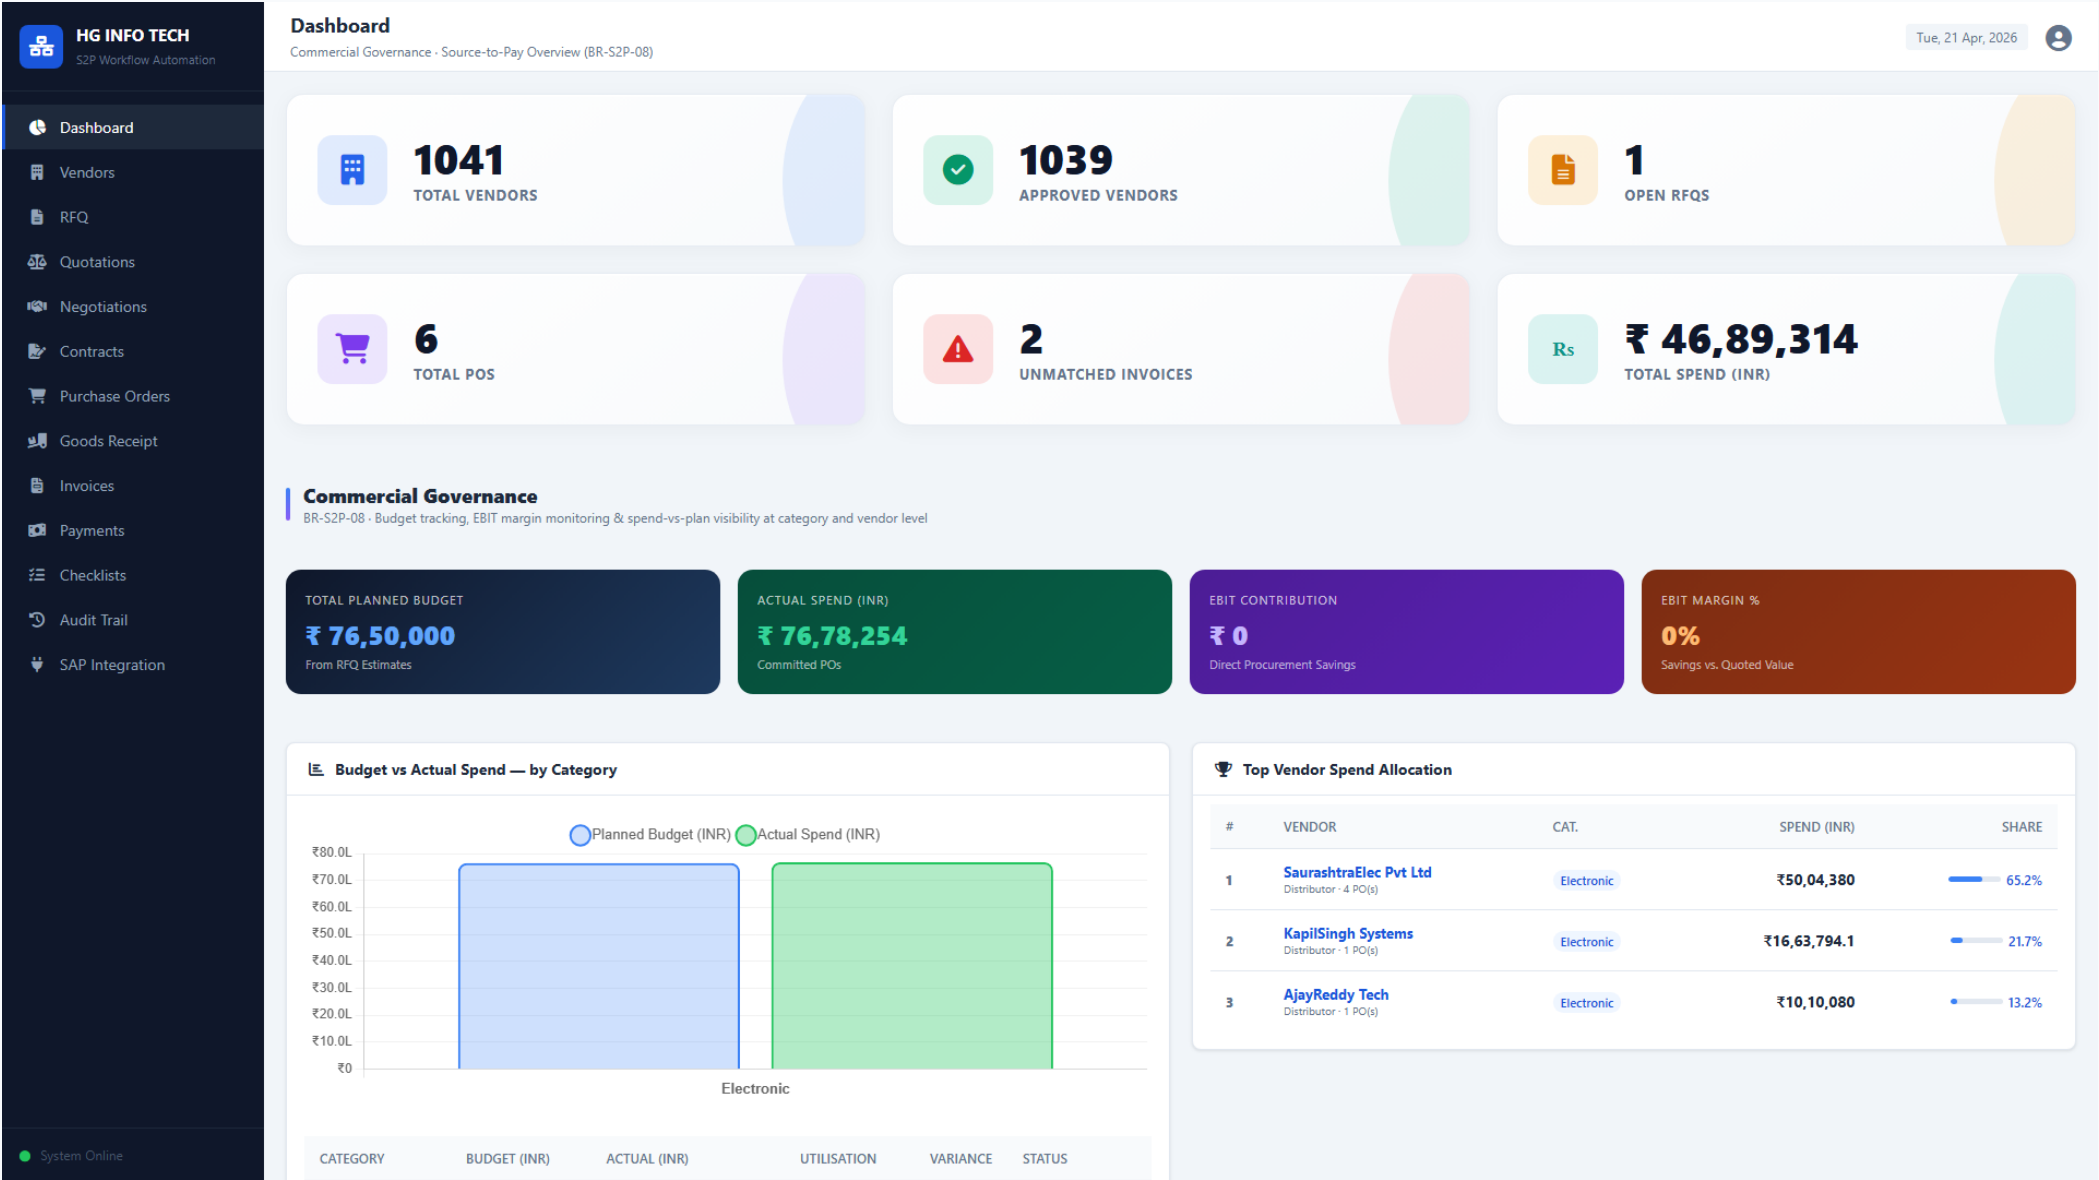

Building the Strategic Procurement Engine for Matrix Comsec Pvt. Ltd.

Current State vs Future State:

- Vendor Master: Google Sheets -> Centralized DB + SAP Sync
- RFQ Evaluation: Manual spreadsheet -> Auto quotation comparison
- Approvals & Governance: Lack of visibility -> Unified dashboard

Run Full S2P Simulation

Simulate Stage 6-8

**DEMO SIMULATOR MODE**
This tool compresses a real 45-day S2P procurement lifecycle into seconds for demonstration purposes.
Simulated: Vendor quotations (auto-priced) · PO auto-approval · GRN (instant delivery) · Invoice (auto-created from PO) · Payment (instant confirm)
Real in production: Use RFQ page → Vendor Portal → Quotations → PO → GRN → Invoices → Payments modules

1 RFQ Loaded

Pending

Waiting for pipeline to start...

2 AI Vendor Discovery

Pending

AI will scan 1000+ vendors by category, OEM status, and performance score.

3 Quotations Generated

Pending

Simulate realistic pricing with ±15% variation per vendor type and OEM status.

4 AI Quotation Comparison

Pending

Weighted scoring: Price 40% · Delivery 25% · Warranty 20% · Performance 15%.

5 Purchase Order

Pending

Auto-create PO from winning quotation with L1 + L2 approval.

6 GRN / Goods Receipt

Pending

Record delivery against PO. Simulates realistic delivery date with ±2-day variance.

7 Invoice & 3-Way Match

Pending

5-check validation: Duplicate · PO Linkage · Vendor Match · Amount (±2%) · GRN Confirm.

8 Payment & Score Update

Pending

Process NEFT payment and auto-recalculate vendor performance score (BR-S2P-13).
